HOW TO ORDER....

IF YOU KNOW WHAT TO ORDER - ASK FOR THE ORDER DESK

Order by mail, fax or call our toll free line 1 (800) 463 - 0743 from 8:00 AM to 5:00 PM EST. Many items are in stock and can be shipped same day upon payment. Minimum shipping order is \$100.00.

IF YOU ARE NOT SURE - ASK FOR OUR SALES DEPARTMENT

Ask our experienced sales staff to help you in choosing the right model or accessory to make sure the job is done right! Our staff have extensive training in all types of steel fabrication applications. We have a complete showroom at your disposal or send us samples and we will be more than happy to return the cut or punched samples to you for approval.

TERMS

All equipment can be purchased C.O.D., by payment in advance, VISA, , MasterCard  or through our popular "Lease to Own" program. Taxes are extra, FOB. factory. * Quoted "Lease to Own" rates are based on a five year term with a 10% buyback (O.A.C). CanSaw Ltd. reserves the right to change pricing or specifications without notice.

DELIVERY

All pricing is F.O.B the Factory. In order to obtain high volume transport discounts, all machinery can be shipped transport prepaid and charged. The incredible savings on freight and insurance are passed on to you! **You know exactly what the machine will cost delivered to your door.**

GUARANTEE

All machinery is warranted against defects in manufacture and workmanship for a period of one year from date of shipment. *Our low prices do not include labour costs*; see our separate warranty sheet for more details.

CONSIDER LEASING....

....IT MAY BE THE RIGHT MOVE FOR YOUR COMPANY!

WHY SHOULD I LEASE?

Because in today's volatile credit market you require financing programs that allow growth without constricting your working capital. Our programs can be structured to complement your cash flow while allowing for the payment of the equipment over its useful life.

WHAT ARE THE COST ADVANTAGES OF LEASING?

Often the entire lease payment is deductible, depending on how the lease is structured and your treatment of the lease. Even in those instances where the payments are not fully deductible, leasing is still a cost-effective financing alternative.

IS THERE A TREND TOWARDS LEASING?

With the leasing industry topping the \$100 billion mark, leasing is now the most popular form of capital equipment financing. All businesses, from very small proprietorships to the very largest corporations, view leasing as an attractive alternative in the acquisition of everything from hydraulic ironworkers to hundred thousand dollar metal cutting sawing systems.

LEASING OFFERS TOTAL FINANCING:

Leasing offers up to 100% financing with little or no down payment. Items such as provincial taxes, delivery charges and other costs may be included in the lease as well.

LEASING OFFERS A COMPETITIVE FIXED RATE:

Inflation can be offset with fixed lease payments for the entire term of the lease. Today's needed equipment can be acquired and paid for with tomorrow's less valuable dollars.

LEASING OFFERS AN ALTERNATIVE CREDIT SOURCE:

Lines of credit established at your bank are left intact for other credit needs (financing accounts receivable etc.). This is an essential feature for expanding businesses because growth requires working capital from every available source.

LEASING OFFERS FLEXIBILITY:

When you need a saw quickly, we can put together a package to suit your needs and to meet your time frame. As your business grows, you can add or upgrade equipment. You'll always be assured of having the right equipment at the right time.

Why Buy Your Next Fabricating Machine From CanSaw, Instead Of A Web Based Discount Dealer Or E-BAY?

CanSaw has been a **FULL SERVICE CANADIAN MACHINERY DISTRIBUTOR** for over 25 years. Unlike our "Web Based" competitors selling in Canada, we offer the best possible assistance *before, during and after the sale is made.*

We include along with our already low price:

A personal visit by one of our sales staff to offer expertise in model selection and suitability of purpose* *(In other words, will the machine you selected "Sight Unseen" on the web do the job you want it to do?).*

Local experience in financing or leasing *(We work with many leasing companies who can offer you the best interest rates and the most flexible payments).*

Knowledge of Canadian customs and import rules and regulations *(In the majority of cases, we take care of customs clearance for you at our expense**).*

Knowledge of Canadian transport rules *(Because we work with transport companies on a daily basis we can usually negotiate a lower freight rate for you).*

Assistance in C.S.A. or local electrical approval *(Required by law in Canada).*

Assistance in the implementation of the PHSR *(Pre-Start Health and Safety Review) Required by law in Ontario since October, 2000.*

In plant operator training on both SAFETY and machine operation by one of our "Factory Trained" personnel* *(We can train multiple shifts if required).*

Local warranty coverage* *(See our separate warranty sheet).*

After sales service by factory trained service reps.

Large parts and consumables inventory.

Expertise in proper consumable selection and use *(We can recommend the right band saw blade tooth pitch or proper punch & die clearance etc.).*

As you can see, "we are not just a voice at the other end of the telephone".

*Ontario & Quebec (Conditions Apply)

** U.S. made products only.

PLASMA CUTTING TABLES

Samson CNC Cutting System:

The Samson™ cutting machine cuts flat parts out of metal with amazing accuracy and speed. Launch your shop into a whole new era!

The new Samson™ CNC plasma cutting table manufactures precise metal shapes from sheet-metal or heavy plate. This rugged, industrial-sized machine cuts 5ft x 10ft material more than 1 inch thick. Powerful servo motors provide cutting speeds up to 1000 inches per minute. Never before has a system with such advanced capabilities been so easy to use and affordable! The Samson™ cutting system is specially engineered for large fabrication and mass production.

The included CAD/CAM software and control system makes it easy to design, layout, and cut various pieces. You can bring in and duplicate almost any shape from scanned images to computer fonts to common drawing programs.

Revolutionize your metalworking business with Samson™!

Plasma Cutting Table:

A common setup is the downdraft table, consisting of panels attached to 3 sides of the machine plus a fan at the back to pull air outside or through a filtering system. Another approach is to place a water tray underneath the cutting grate. The system does not include the side panels shown, a fan, a water tray, or any other dust control components, since each installation is configured differently. Drawings of side panels that you can cut using your machine are included with the software.

4'0" X 4'0" TABLE

\$12,495.00

"LEASE TO OWN"
FOR \$284.89/MTH

5'0" X 10'0" TABLE

\$17,695.00

"LEASE TO OWN"
FOR \$394.07/MTH

Specifications (5' X 10'):

Power Required:

115/230 VAC, 50/60hz, 10A

Can power off same circuit as P.C.

Weight:

700 Pounds, packaged, ships in a single crate.

Dimensions:

133" wide by 82" deep by 97" high, Table surface is 33" high

Cutting Capacity:

Material thickness 1 1/4" max

Material weight 2000 lbs. max

Cutting area 60 1/2" by 120 1/2"

Speeds: (inches per minute)

Cutting/rapid (X/Y) 0.1 to 1,000 ipm

Raise/lower (Z) 4 to 104 ipm

Resolution:

X/Y axes 0.0005 inch

Z axis 0.002 inch

Detailed Metal Art Projects:

Because the Samson™ machine is so fast and accurate, you can manufacture metal art projects with incredible detail. The *Optional* software makes it easy to move your ideas and designs right into production. The new Digital Height Control™ (DHC2) helps the machine run autonomously by consistently setting and maintaining the torch at the right height for cutting.

Silhouette Art Disc: **\$675.00**

HVAC Sheetmetal Fabrication:

Enter the dimensions in the *Optional* software, seams, and other preferences you want. The flat pattern is generated, laid out, and cut by the machine. Then you form and assemble the pieces to make the finished fitting. Of course, you can also draw any mechanical shape directly in the included software. It's easy to nest and cut multiple fittings at once, making the most out of your 5ft by 10ft sheets of material. With Samson™, you'll make top-quality fittings in record time.

HVAC Disc: **\$2,675.00**

CNC Plasma Cutter Cuts Mechanical Parts Quickly:

The Samson™ cutting system is specially engineered for large fabrication and mass production. The new Samson™ plasma cutting table manufactures precise metal shapes from sheetmetal or heavy plate. This rugged, industrial-sized machine cuts 5ft x 10ft material more than 1 inch thick. Powerful servo motors provide cutting speeds up to 1000 inches per minute.
